

ENABLE ARCHIVE

Make directory

```
mkdir /u01/acrhive
```

Setting up recovery file dest directory

```
SQL> alter system set db_recovery_file_dest ='/u01' scope=spfile;
```

```
SQL> Show parameter db_recovery_file_dest;
```

NAME	TYPE	VALUE
------	------	-------

db_recovery_file_dest	string	/u01
-----------------------	--------	------

Setting up archive directory

```
sqlplus
```

```
SQL> alter system set log_archive_dest_2='location=/u01/archive' scope=spfile;
```

```
SQL> Show parameter log_archive_dest_2;
```

NAME	TYPE	VALUE
------	------	-------

log_archive_dest_2	string	LOCATION=/u01/archive
--------------------	--------	-----------------------

Setting up Archive size

```
SQL> alter system set db_recovery_file_dest_size=2G scope=spfile;
```

```
SQL> Show parameter db_recovery_file_dest_size;
```

NAME	TYPE	VALUE

db_recovery_file_dest_size	big integer	2G

Enabling Archive

```
sqlplus
```

```
/as sysdba
```

```
SQL> startup mount;
```

```
SQL> alter database archive log <<<----- to enable archive log
```

```
SQL> alter database open;
```
